## Model 400A Series Gravity Lock

**LOK-A-BIN Model 400A Series** is designed to hold waste, recyclables, and green tightly contained inside the roll-out cart. Once the strap is secured in the retainer, the lid of the cart will push down on top of the material and hold secure against high winds, animal intrusions, transportation and in case of the cart falling sideways or backwards. When dumping the contents by automated or semi-automated tippers, the LOK-A-BIN unlocks automatically when the cart is tilted forward. The LOK-A-BIN can be installed on most existing residential roll-out carts. The lock is manufactured using durable polyethylene material and can be installed in the field or at the factory using four (4) supplied pop rivets. Once installed, the lock will not increase the footprint of the cart and will not interfere with nesting or adjacent-placement. To engage the lock, simply lift the lever, push in the strap through the front slot, and lower the lever. To disengage the lock manually, lift the lever and pull out the strap. For added security, the lock is also designed to accept a customer or hauler supplied long shank padlock or a pre-installed pushlock.

No Lock

Pushlock

Padlock

\* Patent Pending

### Features

- **Easy To Use** – No complicated mechanism and chains; Just slide in the belt and lower the lever
- **Automated** – Unlocks automatically by automated or semi-automated tippers when tilted forward
- **Easy To Install** – Easy to install using 4 supplied pop rivets
- **Space Efficient** – Will not interfere with nesting or adjacent placement of carts
- **Strong Hold** – 100+ lbs hold; wind and animal intrusion resistant
- **Retrofit Existing** – Can be installed on existing carts without bin or lid modification
- **Child Safe** - Will not lock accidentally. This will limit product liability
- **Permanently Attached** – Affixed to the bin and lid that will not come loose
- **Field Replaceable** – In case of accidental damage, can be replaced in the field
- **Lock Out Option** – Accommodates an optional padlock or pushlock for enhanced security.
- **Tough Construction** – Rugged and durable polypropylene construction; UV Stabilized; Weather Proof; Salt Proof
- **Great Value** – Low Cost; Rich Features
- **Good Warranty** – 10 Years
- **Lightweight** – 8 oz
